

POWERED BY FUNDLE · AN E-BROCHURE

Marketplace AutoPilot.

The finance operating system for marketplace sellers. Reconcile every rupee across Myntra, Amazon, AJIO, Nykaa, Tata CLiQ and Flipkart — catch commission leakage, GT reversals and settlement gaps before your CFO does.

THE PROBLEM

Marketplace finance is a spreadsheet crime scene.

Every marketplace hands you a different XLSX, in a different format, at a different cutoff, with fees and commissions that are almost — but not quite — what the contract says. Every month, finance teams re-invent the same reconciliation from scratch. The rupees you're owed get lost in VLOOKUPs.

THE SOLUTION

One ledger. Six marketplaces. Every rupee reconciled.

Marketplace AutoPilot ingests every marketplace file natively, computes what each order *should* have settled at from your contract rate card, and flags the variance — before the month closes. Discrepancies come out as recovery-ready claim packs.

Before

- ✗ 6 different XLSX formats
- ✗ 3 people, 4 days a month
- ✗ Commission errors caught monthly — maybe
- ✗ Recovery claims raised sporadically

After

- ✓ One normalised ledger
- ✓ 2 clicks, 2 minutes
- ✓ Variance caught in real time
- ✓ Recovery pack exported in one click

INSIDE THE PLATFORM

Eight purpose-built modules. One operating system.

Uploads

Drop marketplace XLSX. Columns are auto-mapped. Amazon, Myntra, AJIO, Nykaa, Tata CLiQ and Flipkart parsers ship on day one.

Calculations

Rule-based expected charges — category, sub-category, price band, level, zone. No hardcoding, no guesswork.

Sales Ledger

31-column drillable ledger. Filter by order type, SKU, marketplace, month. Export in one click.

Reconciliation

Match settlement lines against expected charges at the SKU × line level. Every rupee accounted for.

Discrepancies

Every variance surfaced, scored by severity, tagged with a reason and a rupee number.

Recovery

Turn discrepancies into claim packs, track them from raise to closure, and never lose a rupee.

Reports

Monthly, quarterly, YTD and annual reports. One-click Excel export with all 31 fields.

AI Insights

A Morning Brief that reads your ledger before you do. Anomalies flagged before your CFO asks.

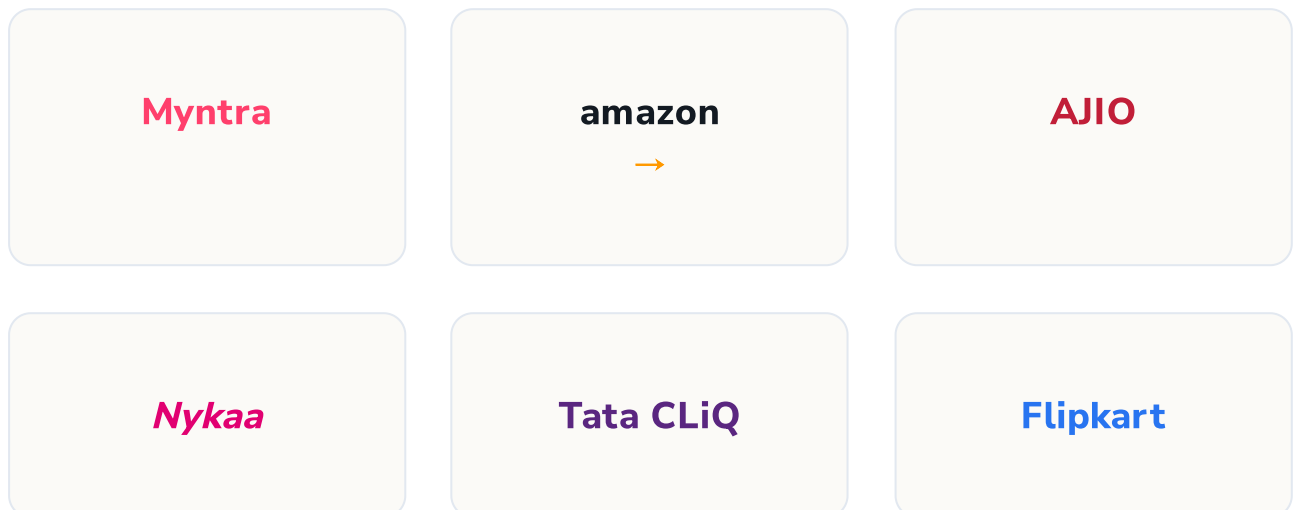

THE WORKFLOW

From Excel to recovered rupees — in 5 steps.

MARKETPLACES SUPPORTED

Native parsers. Day one.

THE ROI

What Marketplace AutoPilot recovers for you.

95%+

of settlements auto-reconciled

The moment your marketplace file lands, the rule engine has already computed expected charges for every line.

<48h

from upload to recovery pack

Discrepancies are exported straight to the marketplace claims format — no rework.

6

marketplaces on day one

Myntra, Amazon, AJIO, Nykaa, Tata CLiQ, Flipkart — native parsers, no custom code.

0

lines of Excel formulas required

Finance teams stop maintaining private spreadsheets. Everything lives in the ledger.

Ready to see it live?

A 20-minute walkthrough is all it takes to know if Marketplace AutoPilot fits your ops.
